Proving our bodies are capable of so much more for over 30 years

Quality medical exercise facilities are in the business of helping their clients move towards the best version of themselves, by understanding that:

- Patients recovery paths are unique;
- Incremental improvements can gradually lead to big life quality changes;
- Supervised exercise regains confidence in patients' own body movement capabilities.

For over 30 years, Dyaco has been rapidly expanding its products and reach around the world to support exercise facilities in helping their clients feel and move better each day.

Quality Equipment + Quality Support and Care = Better Quality of Life

The highest quality exercise solutions worldwide

Meeting the needs of physical therapists, caregivers and patients

Innovative

We innovatively create high-performance and durable exercise equipment solutions that make an impact

Aesthetically-pleasing

We set a visual quality standard for facilities with our smart and minimalistic equipment design

Customised

We tailor solutions by offering quality, affordability and choice so facilities can differentiate themselves

A holistic approach to medical exercise

Impactful technology for both patients and therapists

We care. On an individual level.

Personalising patient recovery and therapist accessibility

Patients are unique. That's why Dyaco's medical range fully respects people as individuals.

Our physiotherapy equipment engages patients in their recovery, tracking progress and improving accessibility through our:

- Design simplicity
- Functional versatility and
- · Seamless sharing of feedback between clinicians, patients and their care communities

Therapists and caregivers are unique too. Our solutions provide them ideal ergonomics and ease of access to treat patients each day.

Our solutions support facilities to deliver one thing: patients recover faster.

Better outcomes for both patients and caregivers

How our Medical Exercise Solutions deliver what matters

Dyaco Medical Exercise Solutions enable physical rehabilitation and movement longevity through taking a holistic approach for both patients and caregivers.

We offer programme versatility, ease-of-use, tracking and seamless communication of relevant metrics between individuals and their care communities to deliver better outcomes for all.

Partnering with Dyaco Medical provides better outcomes that support:

- · Physical therapists to get patients better, faster.
- · Individuals in ongoing exercise participation beyond therapy
- · Connections between patients and healthcare professionals to build confidence

Dyaco Medical Exercise Solutions

Our Product Range

Physical therapy solutions become affordable

Improving quality of life through movement

We offer medical-certified physical and neurological rehabilitation solutions.

We bring a focus on symmetry and gait improvement in various ways, including via isokinetic exercise, and bi-lateral gait and force measurements, amongst other methods.

Our solutions clearly deliver an unmatched value for the price.

Our range of physical therapy solutions provide physical exercise metrics on which caregivers can analyse and evaluate patient's symmetry and gait.

Dyaco medical rehabilitation solutions offer an affordable platform that significantly contributes in achieving better outcomes each and every physical therapy session for almost all stages of the recovery.

Dyaco Medical Exercise Solutions

Improving fitness and mobility for any ability

Dyaco Medical exercise solutions support any patient, no matter their size or movement ability.

We support therapists and caregivers to truly tailor their patients' treatment plans to meet patients' own unique needs.

Our solutions are carefully-designed from the ground up for a holistic view of rehabilitation. We create better outcomes so that patients recover faster, step-by-step.

Speeding up rehabilitation so life really can be lived

Dyaco Medical exercise solutions have been engineered from the patient's perspective throughout each day to make exercise accessible and enjoyable with:

- Welcoming, user-friendly equipment;
- Programs and functionality that give a true representation of a patient's daily activities;
- Fully customisable devices to match each user's fitness and movement ability to speed up rehabilitation so they can live life to the full

Engineered for therapists' needs

Dyaco Medical exercise solutions have been created also from taking the point of view of understanding what physical therapists and caregivers want to treat patients more effectively.

Examples include:

- A raised deck so that care givers minimise back strain
- Wheelchair accessibility for patients with limited mobility

Both our MED and PT ranges of products improve all parties' contribution to faster patient rehabilitation.

Our MED product range

Medically certified, hospital grade rehabilitation devices & accessories

A full suite of solutions for demanding physical therapy

The MED suite of physical therapy solutions provides care givers with advanced features to deliver better outcomes to their patients suffering from a wide range of neurological, cardiovascular, or musco-skeletal issues.

With a holistic approach to rehabilitation, the MED suite helps caregivers analyse the unique needs of their patients in order to create customised treatment plans focused on promoting the ability to move, reduce pain, restore function, and prevent disability.

MED Treadmill - 7.0 T

The MED Treadmill (7.0 T) has been designed with the highest quality standards being awarded medical certification according the CE 93/42 Class IIa.

Packed with features that reflect the true needs of physical therapists, this translates into patients feeling confident and comfortable in using this for their recovery in physical mobility.

This treadmill is a go-to piece of versatile equipment for medical exercise facilities to quickly progress patient recovery from issues such as:

- Neurological challenges;
- Sports injuries;
- Cardiovascular incidents.

MED Recumbent Bike - 7.0 R

The MED Recumbent Bike (7.0 R) not only puts comfort at the forefront of a patients experience, it also has been engineered for every single workout to be highly effective therapy for recovery.

Sitting in and exiting is made easy with its swivelling seat functionality. Perfect for deconditioned or assisted patients to be correctly aligned when sitting for their physical therapy session.

MED Upright Bike - 7.0 U

Comfort is ensured for patients with features like its oversized, padded seat that can also be positioned with precision for an effective ride workout.

The adjustable crank lengths cater for patients with a limited range of motion.

Tracking progress is made simple with METs/Watts measurements and downloadable workout data.

Bi-lateral (separate left and right data) power measurements and graphical feedback are integrated also to carefully monitor asymmetry in mobility so therapists can correct early during treatment for faster recovery.

MED Recumbent Stepper - 7.0 S

The MED Recumbent Stepper (7.0 S) has a semi-recumbent position so hips, knees and ankles are protected from unnecessary strain.

Patients' strength is built effectively with its upper body exercise programme even for users that have limited mobility in their lower body. With its bi-lateral measurements, patients can precisely design workouts to achieve symmetrical balance.

The stepper is extremely useful for therapists to place patients onto this machine and its 360 degrees rotating seat further aids the process for ideal positioning.

With a low step-over height, it is safe for users with limited lower body mobility and motion range to independently get on and off the stepper.

MED Recumbent Stepper with removable seat - 7.5 S

The MED Recumbent Stepper with removable seat (7.5 S) brings accessibility to wheelchair-bound patients while still providing a quality workout.

Ability for upper-only exercise allows for increased cardiovascular conditioning without lower body movement.

This machine is fully compliant with the Americans with Disabilities Act (ADA) to ensure accessibility for the widest range of disabilities.

MED Range Medical accessories

Neurological Pedal

Therapists and caregivers can help patients with severe instability around their foot and ankle with developing their cardio via the upright and recumbent bikes with these specially-designed pedals. The rigid platform, heel cup and secure straps help to isolate the foot while pedaling.

Lower Extremity Stabilisation Set

By isolating injured areas around the knee, patients with knee weakness and instability can now continue their exercise and even be challenged. These straps are secured to the recumbent stepper pedal frame to avoid any knee movement so patients can enjoy their workout and get better faster.

Hand/wrist Stabilisation Set

Patients with arthritis, are severely deconditioned or have suffered a hand or wrist injury in other ways can now continue their upper-body conditioning without feeling limited. The glove-like fit helps with hand placement and is comfortably secured via hook and loop closures.

Our PT product range

Hospital-grade rehabilitation solutions packed with value for commercial use

Dyaco Medical's PT equipment range brings the quality standards from clinical healthcare settings to commercial physical therapists and caregivers. The features included are on par with inpatient, hospital-grade machines with a price for this quality that simply unbeatable level of value.

PT products support patients with the widest range in physical abilities. The small-increment adjustments on each device together with specifications most important to both the therapist and the patient means rehabilitation is truly customised for patients' uniqueness of age, size and physical capability.

PT Treadmill - 4.0 T

The PT Treadmill (4.0 T) delivering to those users' needs that regular treadmills have neglected for too long.

It's the little things that make all the difference, including features such as:

- Extended handrails;
- Easy-access incline and decline;
- Low starting speed; and
- Innovative programs for a wide range of abilities.

The 4.0 T is packed with useful functionality and its quality build provides durability and reliability for commercial uses.

PT Recumbent Bike - 4.0 R

The PT Recumbent Bike (4.0 R) has a low-step entry that is inviting and accessible for users with limited mobility.

Designed with increased comfort in mind for the user, including a comfortable ride experience with its reclined positioning for any user ability.

PT Upright Bike - 4.0 U

The PT Upright Bike (4.0 U) is serves users with a wide range of movement abilities.

It focuses for an effective lower-body strength and conditioning workout.

Users experience a feeling of both smoothness and comfort in riding this bike with design features such as its accommodating handlebar and adjustable seating.

PT Recumbent Stepper - 4.0 S

The PT Recumbent Stepper (4.0 S) makes upper-body only, lower-body only, and total body exercise available in semi-recumbent position to minimise impact on the joints.

The linear resistance is really helps improve user's arms and legs gain critical strength and balance.

For Distributors

Dyaco Medical Exercise Solutions

Who are the products for?

Medical Exercise Solutions market landscape

Dyaco trade partners:

Medical and care suppliers

End users:

- Physical therapy facilities
- · Medical and non-medical rehabilitation facilities
- · Long-term care facilities
